Nomenclature. The 1942 edition of "Standardized Plant Names" published by the American Joint Committee on Horticultural Nomenclature is authority for names used in this catalog.

KELSEY-HIGHLANDS NURSERY

Price List

1959

This price-list of fine nursery stock offered for the 1959 season supersedes all previous editions. Descriptions have been condensed but we believe will be found adequate.

For shipments by freight, express, or parcel post, add 10 per cent of amount of order to cover packing costs. (The minimum charge is \$1.00.) On all such shipments carriage charges are borne by the customer. Charges for truck delivery, except as scheduled within our free delivery area, will be based on the size of order and distance involved.

ALL PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE.

BALL and BURLAP CHARGES

The normal planting seasons are Spring and Fall. However, modern methods of handling allow safe planting during the summer months. This may require balling and burlapping (B&B) of certain varieties not listed as "B&B" in the price list. In such cases, or when balling and burlapping is specially requested, the following additional charges will be added to listed prices:

SHRUBS	15 to 18 in.	.30	TREES	4 to 5 ft.	1.00
	18 to 24 in.	.40		5 to 6 ft.	1.25
	2 to 3 ft.	.50		6 to 8 ft.	2.00
	3 to 4 ft.	.75		8 to 10 ft.	3.00
				10 to 12 ft.	4.50

HARLAN P. KELSEY, INC.
KELSEY-HIGHLANDS NURSERY
East Boxford, Massachusetts

KELSEY'S SALESGROUND — Our modern salesground at our nursery in East Boxford is designed to make your purchase of plants and accessories both pleasant and convenient. One of the largest shade-houses in the country makes it possible to offer a wide variety of specimens for immediate purchase from spring to late fall. Experienced salesmen will help you make the best selection for your particular needs.

KELSEY'S GARDEN SHOP — A complete assortment of the best garden tools, fertilizers, insecticides, grass seeds, and general garden supplies is offered in our Garden Shop, adjacent to our salesground at East Boxford.

KELSEY'S LANDSCAPE SERVICE — For many years we have been noted for the high quality of our landscape service. We have designed and installed distinctive landscaping for modest homes, large estates, and for a wide variety of public and industrial projects. This background of experience can provide the right answer to your landscape problems. Ask for further information.

KELSEY'S "CASH AND CARRY" DISCOUNT — A "Cash and Carry" discount of 5 per cent from posted prices will apply to nursery stock in our salesground, for cash payment and removal by customer's conveyance. (No discount on seeds, insecticides, fertilizers, tools, peat-moss, and similar items.)

KELSEY'S FREE DELIVERY SERVICE — Free delivery service is provided on scheduled days to points within 20 miles of East Boxford. At other times and outside this area, deliveries are by special arrangement at suitable charges. These schedules do not apply to landscape jobs; material for these is individually delivered when planting crews are available.

KELSEY'S "HOW to PLANT" PAMPHLET — Our free booklet, "How to Plant" gives helpful information, an aid to successful results. Careful planting protects your investment. Ask for your copy.

KELSEY'S GUARANTEE — We guarantee to furnish nursery stock in first class condition so that with proper after-care, losses will be reduced to a minimum. Should any stock purchased at our retail prices fail to grow within six months, we will resupply; however, any labor incidental to planting replacements must be paid by the purchaser.

Should we not have plants of the same kind in stock we reserve the right to give credit for the amount paid or supply other plants of equal value.

We will cheerfully resupply any plant found not true to name, or we will refund the amount paid for the same; but it is mutually understood that at no time shall we be held responsible for a greater sum than the purchase price.

Our guarantee is void on accounts not paid within thirty days after date of invoice.

Six percent may be charged on overdue accounts.

Evergreens

A major class of landscape material, the evergreens provide immediate mass-effect, in winter as well as summer. Varying growth characteristics — some tall, some low and spreading — allow selections to suit any purpose or condition.

Here are some of the better sorts. All as supplied with roots "balled and burlapped" (B&B).

ABIES koreana, KOREAN FIR.

Tall, rapid growth; a symmetrical tree with rich green foliage notable for the silver underside of its needles. Particularly valuable as a specimen.

2-2½ ft.	12.00
2½-3 ft.	14.00

JUNIPERUS chinensis 'Hetzi,' HETZ JUNIPER.

Similar to the preceding but with silvery blue-green color. Vigorous spreading growth.

18-24 in. spread	6.50
2-2½ ft. spread	8.50

JUNIPERUS chinensis 'Pfitzeriana,' PFITZER JUNIPER.

Spreading habit, light green, the tips of the branches upturned; a valuable low-border evergreen.

18-24 in. spread	6.75
2-2½ ft. spread	8.50

JUNIPERUS chinensis sargentii, SARGENT CHINESE JUNIPER.

A characteristic spreading Juniper, prostrate, steel-blue. It is an excellent ground-cover for embankment or rock garden.

15-18 in. spread	6.00
------------------------	------

JUNIPERUS communis suecica, SWEDISH JUNIPER.

Narrow columnar form, slow-growing; light bluish green with short, sharp needles. Good "accent" material in a foundation group.

18-24 in.	3.50
2-2½ ft.	4.50

JUNIPERUS horizontalis, CREEPING JUNIPER.

A very hardy trailing Juniper, valuable as a ground-cover where low, flat growth is required.

15-18 in. spread	5.00
------------------------	------

JUNIPERUS horizontalis douglasi, WAUKEGAN JUNIPER.

Almost vine-like in habit, creeping flat on the ground. Its color is bright steel blue.

12-15 in. spread	4.00
------------------------	------

EVERGREENS

JUNIPERUS horizontalis plumosa, ANDORRA JUNIPER.

Another low-growing ground-cover of more compact habit. Green in summer, purplish in fall and winter.

15-18 in. spread	5.00
18-24 in. spread	6.50

JUNIPERUS squamata meyeri, MEYER SINGLESEED JUNIPER.

Slow-growing, of irregular upright form; bright blue color all through the season.

12-15 in.	3.50
15-18 in.	5.00

PICEA asperata, DRAGON SPRUCE.

Very hardy, broad-spreading evergreen of compact growth. It is especially useful for windy or seashore locations. A big tree at maturity.

2-2½ ft.	10.00
2½-3 ft.	13.50

PICEA glauca, WHITE SPRUCE.

Tall-growing native tree, useful as a specimen or for a screening group. Makes a good hedge as it responds readily to shearing.

18-24 in.	4.00
2-3 ft.	5.75

PINUS mugo mughus, MUGHO SWISSMOUNTAIN PINE.

Compact, dwarf evergreen that provides variety of texture to a border planting, with its long needles and deep color. Also useful for a low hedge.

12-15 in. spread	4.50
15-18 in. spread	6.00
18-24 in. spread	7.50

PINUS resinosa, RED PINE.

Rugged, rapid-growing, tall Pine with deep green color. It becomes a broad tree suitable for screen or wind-break.

18-24 in.	4.00
----------------	------

PINUS strobus, WHITE PINE.

Familiar native Pine of rapid growth. Becomes a large tree when planted as a specimen, but may be used as a hedge or screen where it is controlled by shearing.

2-3 ft.	4.50
3-4 ft.	5.75
4-5 ft.	7.50

EVERGREENS

PINUS sylvestris, SCOTS PINE.

Bluish green, with reddish-brown bark; needles of medium length, somewhat twisted. Mature trees are large and shapely.

2-3 ft.	6.00
3-4 ft.	8.00
4-5 ft.	10.00
5-6 ft.	15.00

PSEUDOTSUGA taxifolia, DOUGLASFIR.

Very hardy, symmetrical tree of dense growth; foliage green, sometimes with bluish tints. Most effective as a specimen where it grows into a big tree.

3-4 ft.	8.00
4-5 ft.	10.50
5-6 ft.	13.50
6-7 ft.	16.00

TAXUS baccata 'Repandens,' SPREADING ENGLISH YEW.

Deep green, broad-spreading, especially good for shaded locations. Most effective when allowed room for full development.

2-2½ ft. spread	12.00
-----------------------	-------

TAXUS cuspidata, JAPANESE YEW, spreading form.

A favorite low evergreen for foundation planting, well adapted for the ranch-type house. Foliage dark green; older plants bear red berries in late fall.

15-18 in. spread	5.75
18-24 in. spread	7.75

TAXUS cuspidata, JAPANESE YEW, upright form.

Columnar growth, for taller sections of a foundation group or as a formal specimen. Planted as a hedge it responds readily to shearing.

15-18 in.	5.75
18-24 in.	8.00
2-2½ ft.	10.00

TAXUS cuspidata 'Nana,' DWARF JAPANESE YEW.

Acknowledged a "gem" of the dwarf evergreens. Slow, compact spreading growth, deep rich green color that does not fade.

9-12 in. spread	4.50
12-15 in. spread	6.00
15-18 in. spread	8.00

EVERGREENS

TAXUS media 'Hatfieldi,' HATFIELD YEW.

A shapely upright type, dense dark green; one of the finest ornamentals as individual specimen or for tall groups.

15-18 in.	6.00
18-24 in.	8.50
2-2½ ft.	12.00

TAXUS media 'Hicksi,' HICKS YEW.

Somewhat more open growth than the preceding, with vertically ascending branches. Foliage dark green; red berries in autumn.

15-18 in.	5.50
18-24 in.	7.50
2-2½ ft.	12.00

THUJA occidentalis 'Boothi,' BOOTH GLOBE ARBORVITAE.

A Kelsey specialty, invaluable for low foundation plantings where it retains its compact globular shape without trimming. Useful for a low evergreen hedge; ultimate height less than 3 feet.

12-15 in. spread	2.75
15-18 in. spread	3.50
18-24 in. spread	4.75

THUJA occidentalis 'Douglasi,' DOUGLAS PYRAMIDAL ARBORVITAE.

Dense columnar form with distinctive fronded branchlets, color rich green, wind-resistant. A good formal tall variety.

18-24 in.	3.75
2-2½ ft.	4.50
2½-3 ft.	5.50
3-4 ft.	6.50
4-5 ft.	8.50

THUJA occidentalis 'Pyramidalis,' PYRAMIDAL EASTERN ARBORVITAE.

Probably the best-known of the pyramidal evergreens, narrow formal growth, good deep green color. Its height may be controlled by shearing but otherwise may reach 15 feet or more.

2-3 ft.	4.50
3-4 ft.	6.00
4-5 ft.	8.00

EVERGREENS

THUJA occidentalis 'Wareana,' WARE EASTERN ARBORVITAE.

Broadly pyramidal form, compact rather stiff growth, with foliage deep green of good substance. A very hardy Arborvitae good as a specimen or for hedging.

18-24 in.	4.00
2-2½ ft.	5.00
2½-3 ft.	7.00

THUJA occidentalis 'Nigra,' WINTERGREEN PYRAMIDAL ARBORVITAE.

Sometimes known as "Dark American" Arborvitae as it is a strain resistant to wind-burning in winter. Compact, broadly pyramidal growth, responding readily to shearing to formal shape. Much used for screen or hedging.

2-3 ft.	4.50
3-4 ft.	6.00
4-5 ft.	8.00

TSUGA canadensis, CANADA HEMLOCK.

Native to the north woods, a stately hardy tree widely used for hedges and screens, or as tall specimens.

2-3 ft.	7.00
3-4 ft.	10.00
4-5 ft.	13.50
5-6 ft.	18.00

TSUGA caroliniana, CAROLINA HEMLOCK.

A Harlan P. Kelsey introduction from the mountains of the South, this beautiful evergreen is perfectly hardy, and is valuable for hedge planting as well as being one of the finest of all evergreens when used as an individual specimen.

18-24 in.	5.00
2-3 ft.	7.00
3-4 ft.	10.00

PLANTINGS FOR BIRDS. Birds add beauty and song to the gardens, and are of greatest value in curbing insect damage. Every garden should include plants that provide natural bird food and cover. We know what these plants are and will gladly help you plan their proper use. Birds are a constant joy and entertainment in the garden—a bird-feeding station in a corner of your garden dedicated to bird life will be a continuing delight.

Broadleaf Evergreens

The Broadleaf Evergreens combine all-winter green foliage with spring or summer flowers of varied colors. In general, they thrive best in shade, protected from strong winds. Soil should be cool, moist, preferably acid. Those designated as "B&B" are supplied with soil on their roots.

ARCTOSTAPHYLOS uva-ursi, BEARBERRY.

Essentially a creeping ground-cover that will grow in sun or shade, in good or poor soil. Pink or white flowers in June, followed by bright red berries in late summer.

Pot-grown plants, 6-9 in. spread75
(10 for 7.00; 100 for 65.00)

CALLUNA vulgaris, SCOTCH HEATHER.

The Heathers are low-growing evergreens a foot or more high, with purplish or white flowers in late summer. They prefer a sunny location. Besides the common Heathers there are ten or more hybrids of differing heights and colors.

Pot-grown, 3-6 in.90 10 for 8.00
6-9 in. 1.25 10 for 11.00

DAPHNE cneorum, ROSE DAPHNE.

Distinguished for its fragrant, Mayflower-like blossoms in May or June, with usually a later bloom in September. It grows about a foot high, and may spread two feet across.

6-9 in. spread 2.00
9-12 in. spread 2.75

ERICA carnea, SPRING HEATH.

Resembles a Heather but flowers in early spring, rosy red. Its foliage is needle-like, bright green.

Pot-grown plants 1.25

EUONYMUS fortunei 'Coloratus,' PURPLELEAF WINTER-CREEPER EUONYMUS.

Trailing broad-leaved evergreen, a low bushy climber; featured by its purplish red leaves in fall and winter.

Each 1.50

EUONYMUS fortunei 'Minimus,' BABY WINTERCREEPER EUONYMUS.

Slow-growing, with glossy leaves a half-inch long. This is an excellent miniature for rock garden or low wall.

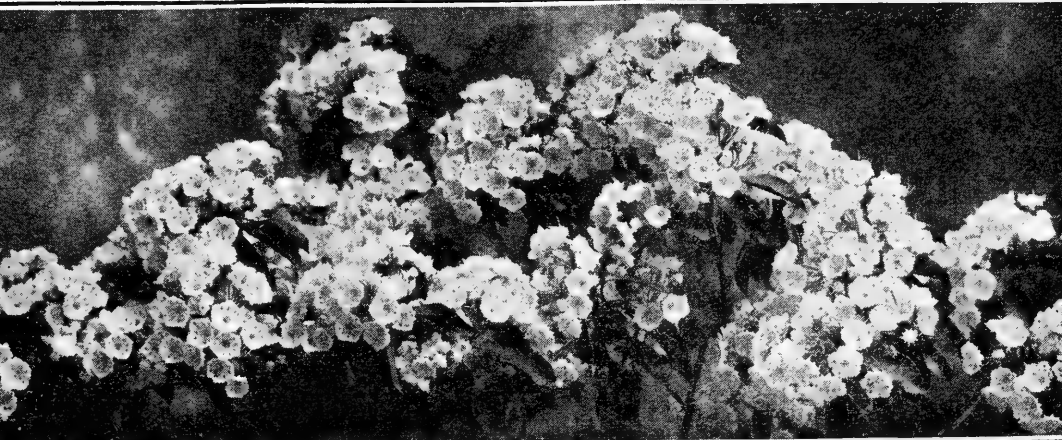

Each 1.50

EUONYMUS fortunei radicans, COMMON WINTERCREEPER EUONYMUS.

Shrubby evergreen vine which will cling loosely to a wall or other support, or become a low spreading bush.

Each 1.25

BROADLEAF EVERGREENS

MOUNTAINLAUREL KALMIA

EUONYMUS fortunei vegetus, BIGLEAF WINTERCREEPER EUONYMUS.

Growth vigorous, with shining bright green leaves an inch or more across. Sometimes used as a low hedge, trimmed to formal shape. Each 2.00

GALAX aphylla, GALAX.

Evergreen ground-cover with glossy green, heart-shaped leaves which turn scarlet in autumn. Delicate white flower-spikes in May. Each 1.50

ILEX crenata 'Convexa', CONVEXLEAF JAPANESE HOLLY.

Oval glossy leaves resembling Boxwood; black berries. The plant is of compact bushy habit. Thrives best in sheltered spots.

15-18 in. (B&B)	6.00
18-24 in. (B&B)	8.50

ILEX glabra, INKBERRY.

A native shrub of the holly family, semi-evergreen. Oval, glossy green leaves; black berries.

12-15 in. (B&B)	3.75
-----------------------	------

KALMIA latifolia, MOUNTAINLAUREL KALMIA.

The familiar showy white or pink flowers in May or June. Plants are irregularly spreading, reaching a height of four or five feet.

15-18 in. (B&B)	5.50
18-24 in. (B&B)	7.00

BROADLEAF EVERGREENS

Beautiful **SHORTIA**
A Kelsey introduction

LEUCOTHOE catesbaei, DROOPING LEUCOTHOE.

Leaves pinnate, waxy green, turning bright red in Fall. The white flowers are in drooping clusters in April or May.

15-18 in., B&B 4.50

PACHISTIMA canbyi, CANBY PACHISTIMA.

This fine-leaved little evergreen is suitable for edging or for a dwarf ground-cover, giving the effect of boxwood. Its foliage turns purplish in winter.

4-6 in. 1.00 10 for 9.00

6-9 in. 1.25 10 for 11.00

PACHYSANDRA terminalis, JAPANESE PACHYSANDRA.

Of particular value as a ground-cover, becoming a carpet of fresh green foliage with small white flower spikes in summer. Good in sun or shade; spreads by underground rootlets.

Pot-grown plants30 10 for 2.50; 100 for 22.00

PIERIS floribunda, MOUNTAIN PIERIS.

Spreading evergreen shrub with oval leaves and upright spikes of white flowers in April or May.

12-15 in., B&B 4.75

15-18 in., B&B 6.50

PIERIS japonica, JAPANESE PIERIS.

Upright growth, with shining narrow leaves and drooping panicles of small white flowers in May. A favorite broad-leaf evergreen useful in foundation groups.

12-15 in., B&B 4.25

15-18 in., B&B 6.00

18-24 in., B&B 7.50

BROADLEAF EVERGREENS

RHODODENDRON carolinianum, CAROLINA RHODODENDRON.

This native of the Carolina mountains is fully hardy in New England and is one of the better dwarf flowering evergreens. Pink flowers in May or June; also a white-flowering form.

15-18 in., B&B	6.00
18-24 in., B&B	8.00

RHODODENDRON catawbiense, CATAWBA RHODODENDRON.

Also of mountain origin, hardy here. Large oval leaves, and bright rosy-purple flowers in May and June. A dependable shrub for general use, growing well in shade.

18-24 in., B&B	8.00
2-2½ ft., B&B	10.00

RHODODENDRON maximum, ROSEBAY RHODODENDRON.

Dark green, long pointed leaves; white or pale pink flowers in June or July. Tall, rugged growth, the largest of the Rhododendrons.

15-18 in., B&B	4.00
18-24 in., B&B	6.00

SHORTIA galacifolia, OCONEEBELLS.

Small galax-like evergreen leaves, with delicate bell-shaped white flowers in earliest spring. A wildflower for shady places, rare and beautiful.

Strong plants	1.50
---------------------	------

VACCINIUM vitisidaea majus, SHORE COWBERRY.

Very low shrub with spreading rootlets, thriving in acid soil with moderate sunlight. Small white or pale pink flowers in May; fruit dark red in late summer.

3-6 in. spread	1.00
----------------------	------

VACCINIUM vitisidaea minus, MOUNTAIN COWBERRY.

Like the Shore Cowberry a good ground-cover, but with deeper pink or red flowers.

3-6 in. spread	1.25
----------------------	------

VINCA minor, COMMON PERIWINKLE (Myrtle).

Trailing evergreen vine, flat on the ground in sun or shade, rooting along its stems. Flowers blue, in early summer; leaves lustrous dark green.

Each40	10 for 3.50; 100 for 30.00
------------	-----	----------------------------

VINCA minor 'Bowles', BOWLES PERIWINKLE.

Improved form of Periwinkle, of vigorous growth and brighter blue flowers.

Each60	10 for 5.50; 100 for 50.00
------------	-----	----------------------------

Shade and Flowering Trees

Here in New England, trees are too often regarded as commonplace — as fixtures in the landscape picture. But it must be realized that trees require time to grow; their placement must be planned with thought for their effect in later years. Careful soil preparation is the best insurance for good growth.

THE MAPLES: This important group of shade trees may be considered as a long life-time investment. They are of varied characteristics and rate of growth, and are relatively free from disease and insects.

ACER platanoides, NORWAY MAPLE.

A practical shade tree for lawn or street planting; rugged growth, symmetrical style, luxuriant foliage. Greenish-yellow flowers in spring, bronzy-yellow fall foliage.

6-8 ft.	7.50
8-10 ft.	10.00
10-12 ft.	13.50

ACER platanoides 'Columnare,' COLUMNAR NORWAY MAPLE.

Upright branching, for use where height rather than spread is desirable.

6-7 ft.	7.50
7-8 ft.	9.00

ACER platanoides 'Schwedleri,' SCHWEDLER NORWAY MAPLE.

Similar to the basic variety, but with red leaves in spring becoming bronzy in summer and fall.

6-7 ft.	7.50
7-8 ft.	9.00

ACER platanoides 'Nigra,' CRIMSON KING MAPLE (Patent No. 735).

A recent hybrid Maple with red foliage all summer. It is a shapely tree of somewhat slower growth than the others; especially good as a lawn specimen.

6-8 ft.	10.00
--------------	-------

ACER pseudoplatanus, PLANETREE MAPLE.

Hardy, vigorous growth; broad-spreading branches, with large leaves. Flowers greenish yellow in spring.

8-9 ft.	12.00
--------------	-------

TREE MOVING EQUIPMENT. Large trees, which are moved with a heavy ball of soil on roots, are lifted and transported with special equipment built for the purpose. Our tree-mover is available for such work, with experienced operatives, at costs figured on time required.

DECIDUOUS SHADE AND FLOWERING TREES

ACER rubrum, RED MAPLE.

This native tree abounds in low ground throughout New England. It takes its name from its red flowers in spring and bright red fall foliage.

8-10 ft.	10.00
10-12 ft.	13.50

ACER saccharum, SUGAR MAPLE.

Also a native Maple, with small yellow flowers in spring and bright yellow, orange or scarlet foliage in fall. Symmetrical growth; a good street tree because of its upright habit.

7-8 ft.	8.00
--------------	------

AMELANCHIER laevis, ALLEGANY SERVICEBERRY (Shadbush).

A small woodland tree with white flowers in early spring; young leaves purplish red.

2-3 ft.	2.00
3-4 ft.	3.50

BETULA papyrifera, PAPER BIRCH (Canoe Birch).

The canoe birch of the Indians, with paper-white bark. Growth is usually straight and symmetrical. Should be planted in Spring only.

6-8 ft.	8.00
--------------	------

BETULA pendula 'Gracilis,' CUTLEAF BIRCH.

A tall tree at maturity, with white bark and slender branches that droop gracefully. This is a favorite ornamental lawn tree. Spring planting only.

5-6 ft., B&B	6.00
-------------------	------

BETULA populifolia, GRAY BIRCH.

The native Birch of woodlands and pastures. Spring planting only.

6-8 ft., B&B	6.00
-------------------	------

(Clumps, two, three, or more stems, priced according to size.)

CLADRASTIS lutea, AMERICAN YELLOWWOOD.

Fragrant white flowers in June; bright yellow fall foliage.

3-4 ft.	4.00
--------------	------

CORNUS florida, FLOWERING DOGWOOD.

The Dogwoods are favorite spring-flowering trees. In May their showy flower bracts attract attention; their brilliant fall coloring is a further feature.

3-4 ft.	6.00
4-5 ft.	7.50
5-6 ft.	10.00

DECIDUOUS SHADE AND FLOWERING TREES

CORNUS florida 'Rubra,' REDFLOWERING DOGWOOD.

Rosy pink flowers, effective contrast to the white variety. The trees grow to medium height, of irregular spreading habit, and thrive in sun or shade although protection from strong winds is desirable.

3-4 ft.	9.00
4-5 ft.	12.50
5-6 ft.	17.50

CORNUS kousa chinensis, CHINESE DOGWOOD.

A small tree, blooming in mid-June; flowers white, followed by clustered red berries.

2-3 ft.	4.00
--------------	------

CRATAEGUS oxyacantha 'Pauli,' PAUL'S SCARLET HAWTHORN.

One of the most colorful of the flowering trees; in late May its double, bright scarlet flowers are spectacular. Upright growth to a height of 20 feet.

7-8 ft.	12.00
--------------	-------

CRATAEGUS phaenopyrum, WASHINGTON HAWTHORN.

Profuse white flowers in May or June, followed by bright red fruits in fall, attractive to birds.

4-5 ft.	6.00
--------------	------

GLEDITSIA triacanthos 'Moraine,' MORaine HONEYLOCUST.

This new thornless variety is of rapid growth and is much admired as a lawn tree. (Patent No. 836)

7-8 ft.	9.50
--------------	------

GLEDITSIA triacanthos 'Sunburst,' SUNBURST HONEYLOCUST.

Similar to the above but with golden yellow tips to the leaves, giving the appearance of sunlight. (Patent No. 1313)

6-7 ft.	6.00
--------------	------

GLEDITSIA triacanthos 'Inermis,' THORNLESS HONEYLOCUST.

Another quick-growing variety with slender branches; fragrant flowers in June followed by long seed-pods. Recommended for seashore planting.

7-8 ft.	7.00
--------------	------

LABURNUM watereri (vossi), WATERER LABURNUM.

Known also as "Golden Chain Tree" because of its showy racemes of pendulous yellow flowers in May or June. A small tree, growing best in a sheltered location.

6-8 ft.	10.00
--------------	-------

The Flowering Crabapples

This group of flowering trees is perhaps the most popular of all. Colors of bloom and fruit cover a wide range. Fruit in general is not edible but is attractive to birds, remaining on the tree until early winter. All varieties are Spring flowering.

MALUS 'Almey,' ALMEY CRABAPPLE.

Flowers and fruit bright red.

6-7 ft. 10.00

MALUS atrosanguinea, CARMINE CRABAPPLE.

Brilliant carmine-pink flowers; small red fruit.

5-6 ft. 6.50

MALUS floribunda, JAPANESE FLOWERING CRABAPPLE.

Familiar early flowering variety, the buds carmine-pink opening to pale pink or white bloom in great profusion.

5-6 ft. 5.00

MALUS 'Hopa,' HOPA CRABAPPLE.

Very hardy, with rose-red flowers and fruit red inside and out.

6-7 ft. 6.75

MALUS hupehensis, TEA CRABAPPLE.

Somewhat fan-shaped growth, with narrow leaves. Flowers deep pink, likely occurring in alternate years.

5-6 ft. 6.00

MALUS micromalus, MIDGET CRABAPPLE.

Upright-growing small tree; pink flowers and yellow fruit.

4-5 ft. 4.50

MALUS purpurea 'Eley,' ELEY CRABAPPLE.

Flowers wine-red; fruit purple, on long stems. Foliage bronzy.

4-5 ft. 5.00

5-6 ft. 6.00

MALUS 'Red Silver,' RED SILVER CRABAPPLE.

Distinguished by its red-green foliage; flowers China-rose; fruit purplish red.

6-7 ft. 6.75

MALUS robusta, CHERRY CRABAPPLE.

Luxuriant white flowers, followed by showy red fruit.

4-5 ft. 5.00

5-6 ft. 6.50

MALUS scheideckeri, SCHEIDECKER CRABAPPLE.

One of the older varieties but outstanding for its double pale pink blossoms. Fruit is yellow.

3-4 ft. 4.00

4-5 ft. 5.00

DECIDUOUS SHADE AND FLOWERING TREES

MAACKIA amurensis, AMUR MAACKIA.

Vigorous small tree with upright racemes of white flowers in June, followed by pea-shape seed pods. Foliage similar to that of a Locust.

6-7 ft. 8.00

POPULUS alba, WHITE POPLAR.

Rapid-growing, tall tree, its foliage light green, silvery on the under-side.

8-10 ft. 6.00

10-12 ft. 7.50

POPULUS nigra 'Italica,' LOMBARDY POPLAR.

Narrow columnar growth, much used for tall screening purposes, reaching a height of 30 feet or more.

8-10 ft. 4.00

PRUNUS cerasifera 'Thundercloud,' THUNDERCLOUD PLUM.

A small ornamental tree with pink flowers, notable for its purple foliage.

5-6 ft. 8.00

PRUNUS sargentii, SARGENT CHERRY.

Abundant single pink blossoms in late April or early May; the foliage rich red in autumn. Fruit pea-size, dark red turning black. At maturity it becomes a tall tree.

3-4 ft. 4.00

4-5 ft. 6.00

PRUNUS serrulata 'Kwanzan,' KWANZAN CHERRY.

Large, deep pink double flowers resembling roses, opening in May. A valuable flowering tree of medium height, combining well with tall shrubs in a border group.

5-6 ft. 6.00

PRUNUS triloba 'Multiplex,' FLOWERING PLUM.

Shrubby small tree with double rose pink flowers in early spring.

3-4 ft. 3.00

QUERCUS palustris, PIN OAK.

A distinctive shade tree suitable for lawn or street planting. Of comparatively rapid growth, with almost horizontal spreading branches; clean bright foliage. An old tree may reach a height of 75 feet or more. One of the best long-lived trees.

8-9 ft. 12.00

DECIDUOUS SHADE AND FLOWERING TREES

SALIX blanda, WISCONSIN WEEPING WILLOW (Niobe Willow).

These Willows are justly popular lawn trees. They are of vigorous growth, spreading and graceful, with pendulous branches as they become older.

6-8 ft.	6.00
8-9 ft.	8.00

SORBUS aucuparia, EUROPEAN MOUNTAINASH.

Showy flat heads of white flowers in May, followed by clusters of orange-red berries in September which are attractive to birds.

4-5 ft.	4.50
5-6 ft.	6.00
6-8 ft.	8.00

SYRINGA amurensis japonica, JAPANESE TREE LILAC.

A hardy, symmetrical small tree with pyramidal heads of white flowers in June. Leathery dark green foliage.

3-4 ft.	3.50
--------------	------

TILIA cordata, LITTLELEAF LINDEN (European Linden).

The Lindens are desirable trees for lawn or street planting; disease and insect resistant; comparatively rapid growth.

This variety bears fragrant yellowish flowers in July.

6-8 ft.	8.00
8-10 ft.	10.00

KELSEY'S "HOW TO PLANT" MANUAL is a free booklet giving a wealth of practical information for the home gardener. Ask for your copy when visiting our salesground.

EVERGREENS FOR HEDGES. Most of the hardy evergreens are suitable hedge material. The usual spacing averages three feet apart; regular shearing induces thick growth and can control the finished height of the hedge.

WATER YOUR EVERGREENS. Plenty of water at time of planting is good insurance. It aids in compacting the soil about the roots, eliminating air-pockets, encouraging root development. Liberal watering in late fall just before the ground freezes does much to prevent winter-killing. During dry summer weather an occasional spraying of the foliage with cold water will freshen the color and perhaps prevent insect infestation.

FREE DELIVERY. Usually it is preferable for our customers to take advantage of our "Cash-and-carry" discount; but otherwise we make free delivery within a twenty-mile radius at stated times in various zones. The salesman has the schedule.

PLANTING SERVICE. We have experienced men available for landscape planting; charges may be on an hourly basis, or a contract price for the project may be quoted.

Flowering Shrubs

Color and season of bloom, and growth characteristics, govern the selection of deciduous shrubs for landscape plantings. Their moderate cost makes them a practical material for borders or screens when initial expense is a consideration. Shrubs should in general be spaced three feet or more apart.

ARONIA arbutifolia, RED CHOKEBERRY.

White flowers in April or May, followed by red berries that persist into early winter. Attractive to birds.

2-3 ft. 1.75

AZALEA calendulacea, FLAME AZALEA.

A favorite hardy Azalea with showy yellow, orange, or scarlet flowers in May or June. Mature height six feet or more.

18-24 in., B&B 5.00

AZALEA mollis, HYBRIDS.

Separate colors, yellow, red, orange, or salmon; large flowers in profusion.

18-24 in., B&B 9.00

AZALEA nudiflora, PINXTERBLOOM AZALEA.

This is a native species with light pink flowers in May.

12-15 in., B&B 3.75

15-18 in., B&B 4.50

18-24 in., B&B 5.00

AZALEA obtusa, HIRYU AZALEA.

A very dwarf little shrub with rosy purple flowers, that holds its leaves almost into winter.

9-12 in., B&B 3.75

AZALEA obtusa kaempferi, TORCH AZALEA.

Variable shades of red or orange flowers in late April or early May.

15-18 in., B&B 5.00

18-24 in., B&B 7.00

AZALEA vaseyi, PINKSHELL AZALEA.

Delicate shades of white, pink, or rose flowers in April or early May. A Kelsey introduction.

15-18 in., B&B 4.50

HOME AND INDUSTRIAL LANDSCAPING. Long experience in the design and planting of home grounds, as well as of more extensive industrial areas, is KELSEY'S background. No charge is made for a preliminary visit; often an on-the-spot estimate is possible.

DECIDUOUS FLOWERING SHRUBS

BERBERIS thunbergi, JAPANESE BARBERRY.

Best known as a hedge-plant, usually set a foot apart in a single row. Yellow flowers in April; deep red berries and bronzy red leaves in fall.

18-24 in. 10 for 6.75; 100 for 65.00

BERBERIS thunbergi atropurpurea, REDLEAF JAPANESE BARBERRY.

Purplish red foliage, a distinctively ornamental variety.

18-24 in. 1.50

BUDDLEIA alternifolia, FOUNTAIN BUTTERFLYBUSH.

Graceful spikes of small flowers in summer, older plants reaching a height of six feet or more. These hybrids give a choice of color. All are best closely trimmed each year.

Burgundy: Red flowers.

Charming: Pink.

Dubonnet: Wine-purple.

Snowbank: Pure white.

Potted plants, 2-year 2.00

CALYCANTHUS floridus, COMMON SWEETSHRUB.

Brownish-red flowers in June, very fragrant. Prefers a sheltered spot but will grow in poor soil.

2-3 ft. 2.00

CARYOPTERIS incana 'Blue Mist,' BLUE MIST BLUEBEARD.

Low-growing shrub with silvery green leaves and spikes of powder blue feathery flowers.

Pot-plants, 2-year 1.50

CHAENOMELES lagenaria, COMMON FLOWERINGQUINCE.

Shrub of medium height, dark green foliage, red apple-blossom-like flowers in May. The large yellow fruits in fall are showy.

2-3 ft. 2.25

CLETHRA alnifolia, SUMMERSWEET CLETHRA.

Woodland shrub for shaded spots, with intensely fragrant white flowers in midsummer.

15-18 in. 1.25

CORNUS alba siberica, SIBERIAN DOGWOOD.

Distinguished by its red bark, especially effective in winter. Its flowers in June are small, white, followed by clusters of white berries.

2-3 ft. 1.50

DECIDUOUS FLOWERING SHRUBS

COTONEASTER adpressa praecox, EARLY COTONEASTER.

Very low, spreading shrub, almost evergreen. It bears large red berries in late fall.

9-12 in. spread, potted 2.50

COTONEASTER horizontalis, ROCK COTONEASTER.

Slightly taller than the preceding but of similar habit. Flowers pink in June; red berries in fall.

9-12 in. spread, potted 2.00

COTONEASTER microphylla, ROCKSPRAY COTONEASTER.

Tiny leaves on arching branches, forming a dense mass. White flowers in June; scarlet berries.

9-12 in. spread, potted 2.50

CYTISUS scoparius, SCOTCH BROOM.

Upright shrub with bright green branches and showy yellow flowers in May and June. Grows to a height of four feet or more.

18 in., potted 3.00

DEUTZIA gracilis, SLENDER DEUTZIA.

A dwarf shrub with clusters of small, bell-shape white flowers in June. One of the best for low growth.

15-18 in. 1.50

DEUTZIA scabra, 'Pride of Rochester.'

This is a taller-growing Deutzia, its flowers sometimes tinted pink. Mature height eight feet.

3-4 ft. 2.50

DIERVILLA sessilifolia, SOUTHERN BUSHHONEYSUCKLE.

Clustered trumpet-shape yellow flowers in June, July, and August. Good foliage, medium height.

18-24 in. 2.00

EUONYMUS alatus, WINGED EUONYMUS.

Notable for its cork-ridged branches and brilliant fall color, the latter suggesting its "Burning Bush" title.

2-3 ft. 3.00

EUONYMUS alatus 'Compactus', DWARF WINGED EUONYMUS.

Slow growth and compact habit make this a desirable low shrub. Like the tall variety it has bright red fall foliage, and will thrive in sunny or shady locations.

15-18 in. 2.25

EUONYMUS latifolius, BROADLEAF EUONYMUS.

Tall shrub of good substance, adaptable to almost any situation with respect to soil or exposure. Yellowish flowers in May or June; red-orange fruits in September.

2-3 ft. 1.50

DECIDUOUS FLOWERING SHRUBS

EXOCHORDA racemosa, COMMON PEARLBUSH.

Slender spreading shrub of medium height, with showy white flowers in May.

2-3 ft. 2.50

FORSYTHIA intermedia 'Spectabilis,' SHOWY BORDER FORSYTHIA.

Always a feature of the April landscape, with its sunny yellow flowers. No shrub border is complete without it.

2-3 ft. 1.50

FORSYTHIA 'Lynwood Gold.'

Improved variety with larger flowers.

3-4 ft. 2.00

FORSYTHIA 'Beatrice Farrand.'

This new variety has immense golden yellow blossoms.

2-3 ft. 2.00

FORSYTHIA 'Spring Glory.'

Profusion of pale yellow flowers.

3-4 ft. 2.00

FORSYTHIA ovata, EARLY FORSYTHIA.

Earliest to bloom, exceptionally hardy. Flowers are light yellow; fall foliage wine-color.

18-24 in. 1.50

HAMAMELIS vernalis, VERNAL WITCHHAZEL.

The fragrant yellow flowers appear in March. Foliage is good, turning bright yellow in fall.

18-24 in. 2.00

HIBISCUS syriacus, SHRUBALTHEA (Rose of Sharon).

Blooms in late August; flowers large and showy. Upright growth to 12 feet; foliage luxuriant dark green.

Double Pink

Double Red

Double Purple

Single White

2-3 ft. 1.75

HYDRANGEA arborescens grandiflora, SNOWHILL HYDRANGEA.

Summer-blooming Hydrangea of low growth. The rounded flower heads are greenish, turning white; the branches usually die back in winter but recover with new growth each season.

2-3 ft. 1.50

DECIDUOUS FLOWERING SHRUBS

HYDRANGEA paniculata 'Grandiflora,' PEEGEE HYDRANGEA.

This is the familiar fall-flowering variety with immense heads of white flowers that turn pink. The shrub is best closely pruned each spring.

2-3 ft. 1.75

KOLKWTZIA amabilis, BEAUTYBUSH.

Arching sprays of small trumpet-shape pink flowers, profuse in June. Sometimes do not bloom the first season after transplanting.

2-3 ft. 2.00

LIGUSTRUM amurense, AMUR PRIVET.

Essentially a hedge variety, preferred because it does not winter-kill in the New England area. The usual spacing single row, is a foot apart.

2-3 ft. 10 for 4.00; 100 for 30.00

LIGUSTRUM ibolium, IBOLIUM PRIVET.

Foliage similar to that of California Privet, holding late into the winter; but entirely hardy and dependable.

2-3 ft. 10 for 4.00; 100 for 30.00

LIGUSTRUM obtusifolium regelianum, REGELS BORDER PRIVET.

A hardy, spreading shrub, excellent for border planting; good foliage, with short panicles of white flowers and black berries.

15-18 in. 1.00

LONICERA tatarica 'Rosea,' ROSY TATARIAN HONEYSUCKLE.

This tall shrub will thrive in sun or shade; the pink flowers in May are followed by red berries attractive to birds.

2-3 ft. 1.25

LONICERA tatarica 'Alba,' WHITE TATARIAN HONEYSUCKLE.

Similar to the preceding, but with white flowers. A good tall shrub for screening purposes.

3-4 ft. 1.75

PHILADELPHUS coronarius, SWEET MOCKORANGE.

Old-time tall shrub notable for the orange-blossom fragrance of its white flowers in late May. It will attain a height of ten feet or more when allowed to develop.

2-3 ft. 1.50

PHILADELPHUS virginialis, VIRGINAL MOCKORANGE.

Semi-double sweet-scented flowers in June; growth of moderate size, a good border shrub.

2-3 ft. 1.75

DECIDUOUS FLOWERING SHRUBS

PHOTINIA villosa, ORIENTAL PHOTINIA.

Slender upright branches, attractive dark green foliage, panicles of white flowers in June. The bright red fruits are conspicuous in October and persist until winter.

3-4 ft. 3.00

4-5 ft. 4.00

PRUNUS glandulosa 'Sinensis,' DOUBLEPINK ALMONDCHERRY.

Commonly known as Double Pink Flowering Almond, this graceful shrub bears masses of rose-like small flowers all along the branches in May.

2-3 ft. 2.00

PRUNUS glandulosa 'Alboplana,' DOUBLEWHITE ALMONDCHERRY.

The Flowering Almonds are old favorites because of their profusion of flowers. They grow to five feet high.

2-3 ft. 2.00

PRUNUS tomentosa, MANCHU (Nanking) CHERRY.

In early spring the flowers are pale pink or white, followed by scarlet fruit in June or July.

2-3 ft. 2.00

ROSA hugonis, FATHER HUGO ROSE.

Bright yellow, single flowers all along the branches in May or June, like showy yellow garlands, always admired.

2-3 ft. 2.25

ROSA rugosa, RUGOSA ROSE.

Large single reddish-purple flowers all summer, with brick-red seed-hips in Fall. Foliage rough, dark green. This shrub rose grows well at seashore; is much used for hedges.

18-24 in. 1.25

SPIRAEA bumalda 'Anthony Waterer,' ANTHONY WATERER SPIREA.

Dwarf, compact shrub, with flat heads of light crimson small flowers in June and July. Grows not much over three feet high.

15-18 in. 1.50

SPIRAEA vanhouttei, VANHOUTTE SPIREA.

This familiar shrub is usually in bloom before Memorial Day, with its arching garlands of small white flowers, a feature of the landscape. Vigorous growth; medium height.

2-3 ft. 1.50

DECIDUOUS FLOWERING SHRUBS

SYRINGA vulgaris, COMMON LILAC.

The old-time dooryards always had Lilacs, which when allowed to grow reach a height of 15 to 20 feet. Their masses of purple flowers, of heady fragrance, are the glory of May.

2-3 ft.	1.75
3-4 ft.	2.00

SYRINGA vulgaris alba, WHITE COMMON LILAC.

Often a few days earlier than the purple variety, otherwise of similar growth.

2-3 ft.	2.00
--------------	------

VIBURNUM carlesi, KOREANSPICE VIBURNUM.

The "Mayflower Viburnum" with clustered little pink, intensely fragrant flowers in May. Foliage grayish green.

18-24 in., B&B	6.00
2-2½ ft., B&B	7.50

VIBURNUM trilobum, AMERICAN CRANBERRYBUSH.

The flat heads of white flowers are followed by colorful scarlet berries. Fall foliage is red-bronze. The Viburnums will grow in shade.

15-18 in.	1.00
----------------	------

WEIGELA florida (rosea), OLDFASHIONED WEIGELA.

Trumpet-shape pink flowers in May or June. A favorite shrub in older gardens and still a valuable color note.

2-3 ft.	1.50
--------------	------

WEIGELA 'Eva Rathke,' EVA RATHKE WEIGELA.

Somewhat lower-growing than the common weigela, with ruby-red flowers in June.

18-24 in.	1.25
----------------	------

WEIGELA 'Vaniceki,' NEWPORT RED WEIGELA.

Billowing clusters of fragrant white blossoms in August and This later introduction is a vigorous grower, with deep red flowers in profusion.

2-3 ft.	2.00
--------------	------

Many shrubs are suitable for tall hedges or screen plantings, spaced according to habit of growth and effect desired. Let us advise selections for specific purposes.

Vines and Climbers

Any considerable expanse of wall surface can best be decorated by adding a suitable vine, supported by a trellis or growing on the surface itself. Certain of the vines also are effective ground-covers for slopes or underplantings.

CAMPSIS grandiflora, CHINESE TRUMPETCREEPER.

A vigorous climber for trellis, with clusters of scarlet, large trumpet-shape flowers in August. Good foliage.

2-yr. 1.50

CELASTRUS orbiculata, ORIENTAL BITTERSWEET.

Shrubby, vigorous vine, notable for its bright orange-scarlet fruit in late fall.

2-year 1.50

CLEMATIS paniculata, SWEETAUTUMN CLEMATIS.

Billowing clusters of fragrant white blossoms in August and September; a hardy vine especially effective on a fence or over a low wall.

2-year 1.50

CLEMATIS virginiana, VIRGINSBOWER.

Deeply-toothed leaves, rugged growth, with masses of small white flowers in late August. Foliage purplish in Fall.

2-year 1.50

CLEMATIS, LARGE-FLOWERED HYBRIDS.

Of more slender growth than the preceding varieties, with showy blossoms three inches or more across. Named sorts in white, purple, red, or light blue.

2-year, potted 3.00

HEDERA helix 'Baltica,' BALTIC IVY.

Hardier than English Ivy, which it resembles. It grows best in shade, adhering closely to a wall or spreading flat on the ground as an underplanting.

Potted plants75 10 for 6.50

HYDRANGEA petiolaris, CLIMBING HYDRANGEA.

An unusual vine for semi-shade, of vigorous growth when once established, clinging to wall or post. Clusters of white flowers in July.

Pot-grown plants 2.50

LONICERA heckrotti 'Goldflame,' GOLDFLAME HONEYSUCKLE.

Shrubby, spreading vine, almost everblooming with tubular flowers red outside, gold inside.

2-year, potted 1.50

VINES AND CLIMBERS

LONICERA japonica halliana, HALLS JAPANESE HONEY-SUCKLE.

This familiar rampant vine thrives in sun or shade and is not particular as to soil. Good for trellis, fence, or as cover for an embankment. Flowers yellowish white, fragrant, in midsummer.

2-year75 10 for 6.50

PARTHENOCISSUS tricuspidata, JAPANESE CREEPER (Boston Ivy).

Traditional cover for brick or masonry walls, clinging closely to the surface. Glossy green foliage turning scarlet in Fall.

2-year, potted 1.50

WISTARIA sinensis, CHINESE WISTARIA.

Long drooping clusters of blue or purple flowers in May and June; strong, woody growth twining to trellis or post.

Heavy field-grown plants 2.50

Fruit Trees

APPLES, Standard 2 yr. \$2.00 each

BALDWIN — Bright red, crisp, winter apple.

CORTLAND — Bright red, spicier than McIntosh. Oct.

DELICIOUS — Red, mild but rich flavor. Nov.

GRAVENSTEIN — Red and yellow striped. Oct.

MCINTOSH RED — The favorite autumn apple. Oct.

APPLES, Dwarf 2 yr. 3.00 each

BALDWIN — Bright red, winter.

CORTLAND — Red. Oct.

MCINTOSH — The favorite.

CHERRIES, Standard 2 yr. 3.00 each

BLACK TARTARIAN — Best sweet cherry, dark purple.

MONTMORENCY — Red. Best sour for pies.

NAPOLEON — Pale yellow with red cheek.

FRUIT TREES

PEARS, Standard 2 yr. 2.50 each

BARTLETT — Yellow, red blush. August.

BEURRE BOSCH — Yellow with russet overlay. Oct.

SECKEL — Small sweet russet-brown. Oct.

PEARS, Dwarf 2 yr. 3.50 each

BARTLETT

BEURRE BOSCH

CLAPPS FAVORITE

SECKEL

PEACHES 2 yr. 2.00 each

BELLE OF GEORGIA — Freestone, white flesh. Aug.

ELBERTA — Popular yellow freestone. Sept.

GOLDEN JUBILEE — Golden freestone. Late Aug.

PLUMS, Standard 2 yr. 3.50 each

ABUNDANCE — Light yellow, fine flavor. Aug.

BURBANK — Dark violet-red, large. Aug.

SHROPSHIRE DAMSON — Blue, heavy bearer. Aug.

QUINCE, Orange — Best for home use. 2.75

BLUEBERRIES, Named varieties 18-24 in. 2.00 each

Use two or more varieties to assure cross pollination for best results.

CONCORD — Tall, late.

JERSEY — Good producer, large. Late.

RUBEL — Large, midseason.

STANLEY — Very productive, tall. Late midseason.

RASPBERRIES 2.00 doz.

LATHAM — Standard red.

SEPTEMBER RED — Everbearing.

GRAPEVINES 2 yr. .75 each Potted 1.25 each

CACO — Very fine amber-red.

CONCORD — Popular deep blue. Late.

FREDONIA — Earliest blue-black, very fine.

SENECA — Large white, sweet, juicy. Early.

Garden Roses

Kelsey roses are this season offered in a new type of growing pots, which allow planting, pot and all, with no disturbance to the root system. The pot deteriorates and acts as a stimulant to vigorous growth of the rose plant throughout the season.

Hybrid Tea Roses

Betty Uprichard.	Rich salmon pink; an older favorite.	\$1.75
Blanche Mallerin.	Pat. 594. New, pure white.	2.50
Crimson Glory.	Deep crimson, with darker shadings.	1.75
Chrysler Imperial.	Pat. 1167. Velvety maroon.	3.00
Condesa de Sastago.	Two-tone, coppery red and yellow.	1.75
Eclipse.	Pure yellow; dainty pointed buds.	1.75
Kaiserin Auguste Viktoria.	Pearl white; good foliage.	1.75
Love Song.	Pat. 1360. Bi-color, pink with coppery yellow.	3.00
Montezuma.	Pat. 1383. New, distinctive brick-red.	3.25
Peace.	Pat. 591. Pale yellow edged with pink.	3.00
Pink Peace.	Pat. appl. for. New blush pink; outstanding.	3.50
President Hoover.	Two-tone, scarlet and yellow.	1.75
Pink Radiance.	Large flower, clear pink.	1.75
President Eisenhower.	Pat. 1217. Bright red.	2.75
New Yorker.	Pat. 823. Velvety scarlet.	3.00
Queen Elizabeth.	Pat. 1259. New, clear orchid-pink.	3.00
White Knight.	Pat. 1359. One of the best new whites.	3.50

Floribunda Roses

Betty Prior.	Large, single, bright pink; tall growth.	1.50
Fashion.	Pat. 789. Free-blooming, coral pink; new.	2.50
Pinocchio.	Pat. 484. Full-petaled, clear pink; good style.	2.25
Red Pinocchio.	Pat. 812. Distinctive deep velvety red.	2.25
Spartan.	Pat. 1357. Large full flowers, coral and scarlet.	3.00
Floradora.	Geranium red with orange tints.	1.50

Climbing Roses

Blaze.	Large double red flowers at intervals.	1.75
Climbing Gladiator.	Pat. 1524. Brilliant rosy red.	3.25
Climbing High Noon.	Pat. 704. Excellent bright yellow.	3.00
Climbing New Dawn.	An older favorite, blush pink.	1.75
Climbing Peace.	Pat. 932. Pale yellow, edged pink.	3.00
Climbing White American Beauty.	Double white, everblooming.	1.75
Paul's Scarlet Climber.	Brilliant red, profuse, early.	1.75

Groundcover Plants

Good groundcover plants are increasingly popular. They are not only beautiful in themselves, but extremely useful in many ways in modern landscaping.

Groundcovers can be used in shady areas and on steep slopes where grass cannot be successfully maintained. They permit wider spacing of the larger plants in the landscape planting, making possible a rich and satisfactory effect without overcrowding.

Groundcovers help to control weeds, conserve moisture, prevent the soil from caking, and protect the roots of the larger plants.

We recommend the following groundcovers, among which can be found varieties for every type of location.
